

PAKMAN ROBOT PACKAGING SYSTEM

The heart of this system is a six axis articulated robot that performs efficiently and reliably to ensure a rapid return on your investment.

- Quick tooling change-over
- Portability makes the Pakman unique in the industry
- Touch Screen set-up with job data recall
- Pack Pattern: Necks up or Necks down
- Compact, space-saving design

DESIGNED TO IMPROVE EFFICIENCY AND REDUCE COSTS

The Pakman Robot Packaging System incorporates superior engineering with the latest robotic technology to reduce costs and give you a competitive edge.

VALUE ADDED FEATURES THAT ENHANCE PERFORMANCE

■ Efficient Change-Overs

- Quick change tooling
- Quick release brackets
- No guide rail adjustments required

■ Provac Vacuum Conveyor

- A unique Proco advantage
- Feeds containers into the system
- Maintains container stability
- Provides for simple change-overs

■ Reliable Control System

- Employs the latest technology
- Engineered for durability
- Touch screen interface and teach pendants for easy operation and set-up

■ Portability

- Most robotic set-ups are fixed in one location
- This system is fitted with heavy duty casters
- Portability maximizes your investment
- Simply move, align conveyors, install program and it's ready to go

■ Safety Guarding

- Guards are fitted with industrial standard safety switches
- System instantly shuts down when opened
- Clear Lexan windows permit observation of system
- Alarms alert personnel should a problem occur
